

A pentagonal pyramid has its base on the H.P. and the edge of the base nearer the V.P. is parallel to it. A vertical section plane, inclined at 45° to the V.P., cuts the pyramid at a distance of 6 mm from the axis. Draw the top view, sectional front view and the auxiliary front view on an A.V.P parallel to the section plane. Base of the pyramid 30 mm side, axis 50 mm long.
